Brand New Book ***** Print on Demand *****.College student drinking to excess is a widespread national problem with serious consequences and it has been for a long time. Although the factors that have made the problem so intractable are complex, today based on scientific research results we have the potential to make real progress in controlling excessive drinking. In fact, a substantial body of research studies now offers direction on how to reduce excessive, underage, and high-risk college drinking. On the basis of this information, colleges and universities, communities, and other interested organizations can take steps toward positive change more confidently. Although significant information gaps remain, the science-based guidance now available means campuses and communities no longer have to reinvent the wheel when they try to address the problem. It also enables us to avoid inadvertently perpetuating ineffective programs and approaches. The availability of science-based guidance is a significant step forward because lack of information about what works and what does not has been a major obstacle to progress. On the research side, high-quality research has addressed only some of the issues of concern to college administrators and the practical implications of research results have not been widely disseminated. On the institutional side, most campus alcohol efforts have not been evaluated, which has hindered the effectiveness of individual campus efforts and slowed the growth of the knowledge base from which all could learn. Although the research base on college alcohol problems is limited, the panel of college presidents, students, and alcohol research specialists that contributed to this report identified a number of effective strategies that colleges and universities could confidently use today. These include strategies for changing the environment to discourage high-risk drinking, affecting the...
