RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 56 pages. Original publisher: Reston, Va. : U. S. Dept. of the Interior, U. S. Geological Survey, 2007 OCLC Number: (OCoLC)163567959 Subject: Water quality management -- Wisconsin. Excerpt: . . . Photographs When personnel measure stream discharge, to minimize errors. Sources of errors attempts are made Field personnel photograph newly installed gage are identified in Sauer and Meyer (1992). Errors can be houses, station controls, reference marks, cableways, random, such as depth errors associated with soft, and upstream and downstream views of the channel to uneven, or mobile streambeds; uncertainties in mean document gaging-station construction, changes in con-velocity associated with vertical-velocity distribution trol and channel conditions (including geometry and errors; and pulsation errors. Errors also include system-egetation), damaged structures, unusual hydrologic v atic errors, or bias, associated with improperly cali-events such as extensive backwater or high-water flow brated equipment or the improper use of such conditions, or to supplement written descriptions. All equipment. To minimize systematic errors, each field field personnel should have a digital camera for record-trip is performed at least annually by someone other ing these conditions and events. If a camera...

Reviews

This pdf is wonderful. It is definitely simplified but excitement from the 50 percent in the ebook. You wont sense monotony at at any time of your time (that's what catalogues are for relating to should you request me).
