Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from Growth During School Age, Its Application to Education This translation of Doctor Godin s *La croissance pendant l age scolaire* is presented to American students of education for the purpose, first, of introducing the writings of a Frenchman who has long been a student of scientific education. Nearly forty years ago the author began the study of education. He has written much and many of his works have won recognition from the highest scientific societies in France. The author merits a wider circle of acquaintances in the United States of America than he has apparently enjoyed up to the present time. A second purpose is to direct greater attention to the contributions to the theory and practice of education in France. The translator inclines to the thought that American educators have tended too much to neglect French educational practice in the study of education. A more careful study of the work of the French along the line of scientific education will prove fruitful to American teachers and educators. In itself this work of Doctor Godin should prove very valuable, first, for its scientific method. Within the last decade or two more emphasis has been placed on collecting statistics on physical growth and development of adolescents. Much of this work has yielded no valuable scientific results. Many figures and much data have been gathered but the method of collecting them has been such that the conclusions based upon them are frequently unreliable or unwarranted. This is especially true in respect of measurements of physical growth of adolescents. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
